

Paper Kite

 20 Minutes

Instructions:

1. Fold the top two corners of the paper to meet in the middle of the paper, similar to a basic paper airplane design. (see step 2 image)
2. Place the 12" skewer or dowel down the middle of the paper and tape it in place. Place the 8" dowel perpendicular across the top of the 12" dowel. It should sit just below the paper you folded down. Tape it down well.

3. Tie your string where the dowels meet. Carefully tie the paper streamer to the end of the 12" wood dowel to create the kite tail. Add a piece of tape over the knot to make it more sturdy.

4. Fold (and tape) the bottom corners of the paper inward to finish the kite design.

5. Decorate the front of the kite with markers and stickers.
6. Tie a long string to the kite where the sticks cross.
7. Take your kite outside and let it fly high!

OVERVIEW

Make your own kite and fly it high!

SUPPLIES NEEDED

- 12" Skewer or dowel
- 8" Skewer or dowel
- Color construction paper or cardstock
- Tape
- String
- Paper streamer
- Decorating materials: markers, stickers
