Torah Circuit

 20 Minutes

Instructions:

1. Fold each sheet of paper in half and place a paper clip at the bottom. Place the sheets of paper next to each other on a tray.
2. Using the glue “Draw” over the Torah outline from the paper clip up the paper and then towards the edge. Be generous with the glue.
3. Sprinkle a good layer of salt on the glue. Lift the paper and dump the extra salt on the tray. Tilt the tray to move the salt to the side.
4. Take the exposed red wire from the battery pack and wrap it around one of the paper clips. Secure in place with electrical tape. Make sure the wire and paper clip make good contact.
5. Repeat with the black wire, attaching it to the other paper clip and securing the connection with electrical tape.
6. Add watercolors to the salty glue lines using a pipette or the tip of a paintbrush. It will flow along the salt and glue drawing.
7. Now, we’re going to turn this into an electrical circuit! Bend the legs of the LED out. Touch the long leg (positive side) of the LED to the glue/salt line attached to the red wire.

OVERVIEW

Want to create your own light? Today we'll make our own electric circuit and find out how we can create light all the time!

SUPPLIES NEEDED

- Salt
- Glue
- Battery Pack with AA batteries
- LEDs
- 2 sheets of cardstock or thick white paper
- Paper clips
- Electrical Tape
- Tray
- Watercolors or Food coloring
- Pipettes or paint brushes

Torah Circuit Continued

8. Lastly, touch the other leg to the glue/salt line attached to the black wire. It should light up!

Think About It

Hashem is The Source of all power and energy. When we connect to Him, we too become powerful. But how can we humans connect to such a Great and Powerful Hashem?! Through the Torah! The Torah is the ultimate circuit board, as it connects Hashem's holy wisdom to you and me. And when we follow in the Torah's ways, we act as lamplighters, bringing light and joy to the world!
