

## Take the Challenge

# Hoops and Shooters

 20 Minutes

### Instructions:

1. Build a basketball hoop.

Tape or thread a pipe cleaner through the

cardboard to create the circle shape of the basketball hoop. You might need to trim the pipe cleaner to form the right sized circle.

2.  Cut the netting fabric to wrap around the top edge of the pipe cleaner hoop. Use tape to attach it. You can use one piece of fabric to wrap around or cut them into several smaller pieces.

3. Add a base to the basketball hoop. Attach the top of a straw to the center back of the cardboard backboard and the bottom of it to another piece of cardboard so that it can stand up straight. Make sure the basketball is sturdy enough to stand on its own.

**Tip:** Cut a small slit at the top of the straw and slide it through the center of the cardboard backboard, then tape it to the cardboard. This will help keep it balanced.

## OVERVIEW

Let's shoot some hoops! Design and build a standing basketball goal and shooting device.

## SUPPLIES NEEDED

- Cardboard (2 pieces, about 4" x 4" in size)
- Pipe cleaner
- Scissor
- Netting (thin fabric with holes, such as tulle, 8" x 8")
- Masking tape
- Large straw
- Cardboard tube (toilet paper roll or paper towel roll)
- Craft sticks (12)
- Rubber bands (3)
- Small cup (about 2oz)
- Ping pong ball
