Mezuzah Protection Power Hunt

 15 Minutes

Instructions:

1. Cut out all the Mezuzot from the Mezuzah hunt file.
2. Choose a room or outside area to have a Mezuzah hunt.
3. Have an adult spread the cut out Mezuzot all over the Mezuzah hunt area when you are out of eyesight.

Variation: Play with a partner:

- Option 1: Compete with a partner in the same Mezuzah hunt to see who can collect the most Mezuzot.

- Option 2: Each partner will choose a different Mezuzah hunt area and hide the Mezuzot from the other. Continue with instructions below.

4. When the hunt is set up, go to the Mezuzah hunt area and set a timer for 90 seconds. Collect as many Mezuzot as you can before the timer goes off!
5. Count how many Mezuzot you collected. How many did you find?
6. Create a beautiful collage on the protective gear collage file by glueing the Mezuzot you found inside the protective gear.
7. Just like wearing protective gear keeps our bodies safe, a Mezuzah on our front door protects our home and all those inside!

Instructions:

1. Paint your wooden Mezuzah case brown, or another color of your choice.

3. Glue the silhouette of the praying person on the bottom of your Mezuzah, and add some "moss" between some stones for a realistic Kotel look!
4. With your parents help, insert a real Mezuzah scroll into the case, and follow the instructions in the Mezuzah placement guide to properly affix it to your door frame!

Think About It

Having a Mezuzah on all our doorways

is a special Mitzvah in the Torah. It reminds us to act as proud Jews both inside and outside of our homes! Inside the Mezuzah is a special scroll that contains the words of the Shema prayer. 2. Fold your paper into a fish as shown in the step-by-step instructions below.

OVERVIEW

Master the art of folding origami fish and create a magnetic fishing pond. Race to “catch” all the fish in record breaking time!

- String
- Magnet
- Bucket

ONLINE RESOURCES

Magnet Fishing (continued)

3. Decorate your fish using markers. Add eyes, fins and scales- get creative!
 4. Repeat steps 1-3 to create 10 fish for the “magnet aquarium”.
 5. Place a paperclip on each paper fish. Make sure they are clipped on securely and won’t fall off.
 6. Set up all 10 fish on a flat surface area, this will be the “fishing pond”.
 7. Tie one end of a string to the wooden rod or stick.
 8. Tie a magnet to the other end of the string.
- Try placing the paperclips in different parts of the fish. Is it easier to catch them in some areas more than others?

Play with a partner:

Play by yourself:

- Each partner will need their own magnet rod (see steps 6-7) and bucket.
 - Set your buckets equally distanced from the fishing pond. You may not move the bucket during the game.
 - Set a start signal for both you and your partner to begin “fishing” with your magnet rods.
 - You may only use the magnet rods to catch the fish. Once a fish is caught and hanging over your bucket, you may use your hand to remove it from the magnet and place it inside the bucket.
 - The player who catches the most fish in their bucket is the winner!
 - You can make this more challenging by creating and adding more fish to the “pond”.

3. Glue or tape two layers of plastic wrap or clear sheet protectors as tightly as possible on the inside of the box across the opening you cut in the lid. This will allow the air inside the box to heat up but keep the heat trapped inside the box.

4. Glue black construction paper to the bottom of the box. The black color will absorb the heat.

5. Break graham crackers in half to make squares. Place four squares in the solar oven and place a marshmallow on each.

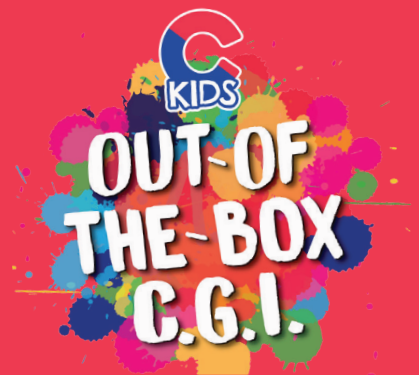

Note: It takes the marshmallow longer to melt than the chocolate, so first we'll melt the marshmallow and then add the chocolate on top.

6. Close the oven lid (the part with the plastic wrap on it) tightly, and tape a wooden stick to prop up the oven door flap.

7. Set your oven outside in the direct sun, the open flap will reflect the light into the box.
8. Depending on how hot the day is, and how directly the sunlight shines on the oven, the marshmallows will take 30 to 60 minutes to get squishy when you poke them.
9. When marshmallows are squishy, open the oven lid and place a piece of chocolate (about half the size of the graham cracker square) on top of each marshmallow. Place another graham cracker on top of the chocolate and press down gently to squash the marshmallow.
10. Close the lid of the solar oven and let the sun heat it up for a few minutes more, just to melt the chocolate a bit.
11. Enjoy your tasty treat!

7. Take the medium brown and shade in your stones.
8. Next we are going to create the small bushes that are popping out of the kotel. To do this we are going to take the very dark mixture and our thin brush and make some swooping lines going outward and downward coming out of some of the stones.
9. To make the people, use the small brush and the very dark coffee paint. Draw figure like ovals at different points of the ground to create the people closer and farther away from the kotel

10. Let it dry and then hang up your masterpiece!
