

## Oobleck

 15 Minutes

### Instructions:

1. Pour cornstarch into the bowl.
2. Add a few drops of food coloring to the water.
3. Slowly add water to the cornstarch mixture. Don't add it all at once.
4. If its too runny, add a little more cornstarch.
5. Test out the oobleck!

### What's Happening?

Oobleck is a mixture of cornstarch and water. When you put pressure on it quickly, the cornstarch sticks together, making it solid. When there is no pressure, it releases into a liquid.

### OVERVIEW

Make a slime that is solid and liquid at the same time!

### SUPPLIES NEEDED

- Bowl
- Spoon
- ½ cup water
- 1 cups cornstarch
- Food Coloring
